ILLINOIS JOURNAL OF MATHEMATICS

Contents of Volume 50 (2006)

Rodrigo Bañuelos, Pedro J. Méndez-Hernández, Hot–spots for conditioned Brownian motion 1

Martin T. Barlow, Takashi Kumagai, Random walk on the incipient infinite cluster on trees 33

Federico Bassetti, Persi Diaconis, Examples comparing importance sampling and the Metropolis algorithm 67

Robert O. Bauer, Roland M. Friedrich, Diffusing polygons and SLE(κ, ρ) 93

István Berkes, Walter Philipp, Robert F. Tichy, Empirical processes in probabilistic number theory: the LIL for the discrepancy of $(n_k\omega)$ mod 1 .. 107

Jean Bertoin, Jean-François Le Gall, Stochastic flows associated to coalescent processes III: Limit theorems 147

Jean Bourgain, Nonlinear Schrödinger equation with a random potential 183

Krzysztof Burdzy, Zhen-Qing Chen, Peter Jones, Synchronous couplings of reflected Brownian motions in smooth domains 189

Donald Burkholder, Joseph Leo Doob (1910–2004) vii

Zhen-Qing Chen, Masatoshi Fukushima, Jiangang Ying, Entrance law, exit system and Lévy system of time changed processes 269

Zhen-Qing Chen, Krzysztof Burdzy, Peter Jones, Synchronous couplings of reflected Brownian motions in smooth domains 189

Burgess Davis, Jiyeon Suh, On Burkholder's supermartingales 313

D.A. Dawson, E.A. Perkins, On the uniqueness problem for catalytic branching networks and other singular diffusions 323

Persi Diaconis, Federico Bassetti, Examples comparing importance sampling and the Metropolis algorithm 67

E.B. Dynkin, A note on X-harmonic functions 385

P.J. Fitzsimmons, R.K. Getoor, Excursion theory revisited 413

Hans Föllmer, Anne Gundel, Robust projections in the class of martingale measures 439

Roland M. Friedrich, Robert O. Bauer, Diffusing polygons and SLE(κ, ρ) 93

Masatoshi Fukushima, Zhen-Qing Chen, Jiangang Ying, Entrance law, exit system and Lévy system of time changed processes 269

R.K. Getoor, P.J. Fitzsimmons, Excursion theory revisited 413

Anne Gundel, Hans Föllmer, Robust projections in the class of martingale measures 439

István Gyöngy, Nicolai Krylov, Expansion of solutions of parameterized equations and acceleration of numerical methods 473

Peter Jones, Krzysztof Burdzy, Zhen-Qing Chen, Synchronous couplings of reflected Brownian motions in smooth domains 189

Yuji Kasahara, Shinzo Watanabe, Brownian representation of a class of Lévy processes and its application to occupation times of diffusion processes 515

Robert Kaufman, Mixing and descriptive set theory 541

Harry Kesten, Vladas Sidoravicius, A phase transition in a model for the spread of an infection 547

Panki Kim, Renming Song, Two-sided estimates on the density of Brownian Motion with singular drift 635

F.B. Knight, J.L. Steichen, The probability of escaping interference 689

Nicolai Krylov, István Gyöngy, Expansion of solutions of parameterized equations and acceleration of numerical methods 473

Takashi Kumagai, Martin T. Barlow, Random walk on the incipient infinite cluster on trees 33

Gregory F. Lawler, The Laplacian-b random walk and the Schramm-Loewner Evolution 701

Jean-François Le Gall, Jean Bertoin, Stochastic flows associated to coalescent processes III: Limit theorems 147

Peter Loeb, Yeneng Sun, Purification of measure-valued maps 747

Terry J. Lyons, Nadia Sidorova, On the radius of convergence of the logarithmic signature 763

Pedro J. Méndez-Hernández, Rodrigo Bañuelos, Hot–spots for conditioned Brownian motion 1

Michel Émery, Chaotic representation property of certain Azéma martingales 395

Ashkan Nikeghbali, Marc Yor, Doob's maximal identity, multiplicative decompositions and enlargements of filtrations 791

E.A. Perkins, D.A. Dawson, On the uniqueness problem for catalytic branching networks and other singular diffusions 323

Walter Philipp, István Berkes, Robert F. Tichy, Empirical processes in probabilistic number theory: the LIL for the discrepancy of $(n_k\omega)$ mod 1 .. 107

Dmitry Rokhlin, Walter Schachermayer, A note on lower bounds of martingale measure densities 815

Ken-iti Sato, Additive processes and stochastic integrals 825

Walter Schachermayer, Dmitry Rokhlin, A note on lower bounds of martingale measure densities 815

Vladas Sidoravicius, Harry Kesten, A phase transition in a model for the spread of an infection 547

Nadia Sidorova, Terry J. Lyons, On the radius of convergence of the logarithmic signature 763

Renming Song, Panki Kim, Two-sided estimates on the density of Brownian Motion with singular drift 635

Richard B. Sowers, Random perturbations of two-dimensional pseudoperiodic flows 853

J.L. Steichen, F.B. Knight, The probability of escaping interference 689

Daniel W. Stroock, David Williams, Further study of a simple PDE 961

Jiyeon Suh, Burgess Davis, On Burkholder's supermartingales 313

Yeneng Sun, Peter Loeb, Purification of measure-valued maps 747

Robert F. Tichy, István Berkes, Walter Philipp, Empirical processes in probabilistic number theory: the LIL for the discrepancy of $(n_k\omega)$ mod 1 .. 107

John B. Walsh, On numerical solutions of the stochastic wave equation 991

Shinzo Watanabe, Yuji Kasahara, Brownian representation of a class of Lévy processes and its application to occupation times of diffusion processes 515

David Williams, Daniel W. Stroock, Further study of a simple PDE 961

Jang-Mei Wu, Doob's contribution to function theory 1019

Jiangang Ying, Zhen-Qing Chen, Masatoshi Fukushima, Entrance law, exit system and Lévy system of time changed processes 269

Marc Yor, Ashkan Nikeghbali, Doob's maximal identity, multiplicative decompositions and enlargements of filtrations 791
